Retail Displays and Merchandisers

Countering

Merchandisers

This modern, clean line styled, exclusive range of free standing mobile display units offer five levels of display maximising food product display within the minimum footprint.

Ideal for today's Grab and Go type retail and convenience store outlets. Matching ambient and chilled units provide the perfect display area for product merchandising in onsite catering installations or as part of high street food takeaway stations.

The self contained display units with an open design increased product visibility and accessibility.

The robust shelves are adjustable for height allowing flexibility regarding the types of products being displayed.

Complete with castors for easy installation as well as providing an easy means of moving the unit for cleaning.

Free-Flow Grab & Go

MHC1 Heated and chilled

- Function:**
- Presenting both hot and cold food in complementary displays
 - Offering a complete meal deal within a small foot print
 - Displays pre-heated and pre-chilled food at regulated temperatures

- Controls:**
- Accurate digital controls ensure consistent air flow both hot and cold
 - Hot food maintained at 65°C to 75°C, chilled maintained at 2°C to 5°C
 - Independent illumination on / off switches
 - Internal refrigeration condensate self-evaporation system

MHC1 Heated

- Function:**
- Perfect for holding paninis, pasties, soup etc.
 - Displays pre-heated food at regulated temperatures

- Controls:**
- Accurate, digital controls concealed behind hinged flap
 - Hot food maintained at 65°C to 75°C
 - Independent illumination on / off switch

MC1 Chilled

- Function:**
- Perfect for sandwiches, filled rolls, dairy products, and drinks etc.
 - Displays pre-chilled food at regulated temperatures

- Controls:**
- Accurate, digital controls concealed behind hinged flap
 - Gentle air-flow system maintains food in a fresh condition
 - Displayed products maintained at 2°C to 5°C
 - Independent illumination on / off switch
 - Internal condensate self-evaporation system

MA1 Ambient

- Function:**
- Complimentary ambient display cabinet
 - Ideal for confectionary, biscuits, doughnuts and crisps etc.

- Controls:**
- LED light switch concealed behind hinged flap

- Hygiene and Safety:**
- Mobile with front brakes allow stress-free maintenance and cleaning
 - Ergonomic handles at the rear for easy manoeuvrability
 - Constructed from 304 and 430 grade bright polished stainless steel
 - All glass 6mm toughened
 - High-grade insulation improves temperature retention
 - Coated evaporator coils provide longer life and hygiene

Chilled Merchandisers

The merchandiser has a refrigerated well with recirculating cold air which cascades down the front and over the shelves to ensure even temperatures of 2°C-8°C. The compact unit makes maximum use of space to display large quantities of chilled food and drinks in a self-service environment. Ticket holders for front of shelf and night blind are available. Please note if these units are to be used for overnight storage it is essential that a night blind is fitted, failure to do this may invalidate the warranty.

Chilled Multi Tier Display
Models MM9, MM12, MM15, MM18

Chilled Multi Tier Display units are designed for self service, holding pre-chilled food at regulated serving temperatures suitable for the display of most types of cold foods. Complete with an inset well and four adjustable shelves for increased product display, a gentle flow of cold air flows through the cabinet maintaining a safe and compliant temperature within.

The thermostatically controlled Chilled well has an automatic defrost as well as an automatic condensate water evaporation system eliminating the need to manually empty drip trays or install onsite drainage.

The accurate digital display controls are housed conveniently within the top of the unit for easy access.

Complete with illumination for increased food presentation.

All Chilled merchandisers are supplied with a 2 meter long cord and plug for easy installation.

The refrigeration condensing unit and compressor are house within the base of the unit which is open at the rear for easy maintenance.

The condensing unit has a removable door vent for easy cleaning.

All model use CFC free R404A refrigeration gas.

Optional roller night blind to aid 24 hour operation.

Complete with all swivel castors two with brakes.

A slide on kick plate conceals the castors when the unit is in position.

Note: These models are also available with the option of a square top canopy combined with built-in lockable roller shutter. Shutters are supplied in white finish only, if coloured shutters are required these are priced on an individual basis. See LSA codes below and price list for details.

Ambient Merchandiser

- Ideal for confectionery, crisp snacks and fruit etc
- Designed to compliment chilled range of merchandisers
- Complete with Four robust adjustable for height stainless steel shelves
- Fitted with castors as standard for mobility easy cleaning etc
- Illumination for increased product display
- Open design for increased product visability
- To be used between two merchandisers only

Note: The AM5 and AM5LSA can be purchased in conjunction with the Chilled Merchandisers but should not be used in isolation for stability reasons.

All electrical units under 3kw complete with mains lead and 13 amp plug.

Warning: The condensing coil must be kept free from dust and must be cleaned regularly to maintain the performance of the unit. Air borne particles can choke the fins of the condensing coil. The coil should be cleaned with a soft brush to loosen the dust then vacuum cleaned to remove it

Important: To obtain the maximum performance and efficiency from these units it is imperative that the ambient room conditions do not exceed a temperature of 25° or exceed a relative room humidity of 60%

Grab & Go

Heated Table-top Multi Tier Display

GGHT2

- Designed to keep pre-cooked food at serving temperature and are suitable for the display of most types of hot foods,
- Ideal for Panini's Toasties Hot-Rolls Pies Pasties and chicken portions etc

Important: To obtain the maximum performance and efficiency from these units it is imperative that the ambient room conditions do not exceed a temperature of 25° or exceed a relative room humidity of 60%

Note:

- Do not install units in draughty conditions where the air movement is greater than 0.2mtr/sec. (For example near entrance/exit doors, open windows, under air conditioning units or a ceiling mounted fan).
- Do not install units where there is high solar radiated heat (for example direct sunlight, room heaters, or bright spot lights).
- When loading refrigerated display units for best performance and refrigeration efficiency a gap should be left between the products allowing the cold air to pass through and recalculate.
